DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The amended claims feature a computer network with network devices forwarding session traffic, where the reception of a resource reservation message takes place, corresponding to a first flow, and the message corresponds to a session group identifier. The resources are then reserved. A second resource reservation message is received, corresponding to a second data flow, which also corresponds to a second session group identifier. The two IDs are compared, and if they match, determining whether the first flow is sharing resources with a third data flow with a session ID different from the first flow takes place. If this is not the case, the resources are shared between the first flow and second flow, where the session IDs include more than one source or destination. Because sharing the resources between the first and second flows with a same session ID first requires a check to see whether a first and third flow are sharing resources, and because the session IDs include one or more flow sources and destinations, it is believed that the claimed invention is novel. The examiner was unable to procure prior teachings of such features as claimed by the amended claims, and could not render said features obvious to one of ordinary skill in the art, without the use of impermissible hindsight constructions. Additionally, Applicant's remarks regarding the claim amendments and the provided prior art references' deficiencies are persuasive, in that neither the Jappila and Primak references taken singly, or in combination, teach the newly claimed features. It is therefore the examiner's belief that the claimed invention does indeed possess novelty.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should clearly be labeled "Comments on Statement of Reasons for Allowance."
